The main benefit of an eDM campaign is that it's one of the only forms of mass communication that provides usable data and analytics that can assist with future planning. You can view how many people opened your email, how many took action as a result, which link they clicked on, how many people clicked on each individual link, all valuable data that will help you calculate an exact return on investment (ROI).

An eDM campaign can save our clients time and money by making it simple for them to reach large, targeted audiences that would have previously been out of their reach.

The most important aspect of an eDM is a client's ability to customise and personalise their message. Unlike traditional marketing platforms, an eDM allows our clients to specifically design a message, offer, competition, free demo etc to encourage and entice subscribers to engage with their eDM.
